***DETAILED ACTION***

1. This action is responsive to communications: original application filed 02/09/2000.
2. Claims 1-104 are currently pending in this application. Claims 1,3,14,20,29, 32-33,37,39, 51, 57,67, 70, 73, 85, 91, 100 and 104 are independent claims.

***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2, 14-19, 37-38, 51-56, 71-72, and 85-90 drawn to a computer-implemented method for delivering a customized Internet document to a client, classified in class 715, subclass 501.1.
  - II. Claims 3-13, 20-28, 33-36, 39-50, 57-66, 73-84 and 91-100 drawn to a computer-implemented method for delivering a customized electronic email message to a client, classified in class 715, subclass 501.1.
  - III. Claims 29-31,67-69, and 101-103 drawn to a computer-implemented method for generating localized versions of a localizable Internet document for delivering to a client, classified in class 709, subclass 217.
  - IV. Claims 32,70, and 104 drawn to a computer-implemented method for delivering a localized document to a client, classified in class 709, subclass 245.
4. The inventions are distinct, each from the other because of the following reasons:

Each group of claims is directed to a separate invention. It is noted that groups maybe belong to a computer-implemented method. However, this is not sufficient to prevent a restriction requirement. It is also noted that the invention of Group I and II although are classified in the same class and subclass.

- Inventions I and II are related as combination and subcombination. Invention in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination is for delivering a customized electronic email message to a client. The subcombination has separate utility such as encoding the plurality of message components as the customized electronic mail message.

5. Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as generating localized versions of a localizable Internet document, and invention IV has separate utility such as delivering a localized document to a client. See MPEP § 806.05(d).

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter restriction for examination purposes as indicated is proper.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 2176

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
